Tampala is different in flavor from other vegetables used as "greens." It retains its tenderness for a longer time, has a consistency and flavor all its own, more flavor, more body, and more food value than either spinach or chard—a pleasing change from all other "greens." It does well in hot weather and will keep on producing all summer. Pkt. 15c, oz. \$2.00.

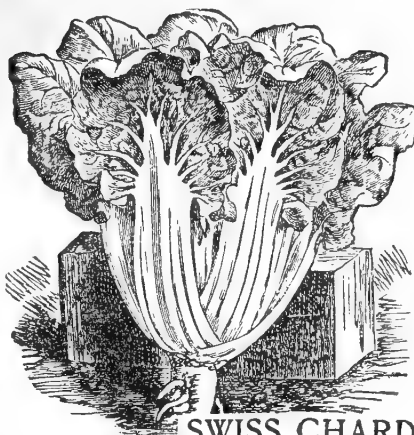

Celtnuce

Remove all the outer skin and fibrous layers down to where they become light green and tender. As a raw vegetable, cut the stalks into 4- or 5-inch lengths and split lengthwise; chill and eat as you would celery.

Cooked Celtnuce stalks are pale green, attractive in appearance and have a pleasing, mild flavor.

Celtnuce is easy to grow. Plants grow quickly, forming a rosette of light green leaves which may be used, when young, as "greens." In less than 90 days after seed is sown, the central stem or stalk is usable and will be found most tender at this age. The stalks are solid throughout, the skin greenish white and tough but the inside is very succulent, most delicate pale green, crisp and brittle. Make first sowing of seed as soon as ground can be worked in the spring. Succession sowings at intervals of a week or ten days will give a continuous supply. Pkt. 10c, oz. 75c.

Chinese Cabbage

One ounce of seed will sow 400 feet of row.

Pkt. 15c, oz. 50c, ¼ lb. \$1.20, ½ lb. \$1.90, lb. \$3.75.

Wis. Ballhead

Wisconsin Ballhead. (Yellows-Resistant.) (105 days.)

After years of careful breeding this new strain was originated and in trials it has proven 100% resistant to Yellows, which is not true of No. 8. It is also more uniform and in fact more uniform than any of its type ever seen and is somewhat earlier than the No. 8. It was not bred from Wis. No. 8 but from an entirely new strain of cabbage. For market gardening, shipping and storage purposes it is second to none. Pkt. 15c, oz. 50c, ¼ lb. \$1.45, ½ lb. \$2.25, lb. \$4.25, postpaid.

For the fall or main crop, sow the seed in the open ground as early in the spring as the soil can be worked into good condition. Plants will be ready for setting in rows in July. Celery requires a rich, well-manured soil and plenty of moisture so that it can make a continuous growth. Soil, boards, or Celery paper may be used to blanch the stalks. Golden Cross Bantam

Wilt Resistant—High Yield—Uniform

We recommend this new hybrid sweet corn for places where Stewart's disease (wilt) makes it impossible to grow ordinary varieties of sweet corn. The ears have 10 to 14 rows of golden yellow kernels, uniform in length (about 8 in.) and of excellent quality. LETTUCE BIBB (Limestone)

57 days. This dark green, tender, brittle lettuce, which quickly makes loose heads as big as your fist, is becoming well known to chefs of luxury hotels and to high priced food shops. Some say it was once known as "Half-Century," others that it was bred by Maj. John Bibb, of Kentucky, born in 1789. It is making a comeback and we can promise you a fine spring crop, but must warn that it goes to seed quickly in hot weather. Pkt. 10c, oz. 45c, 1/4 lb. \$1.60.

Big Boston Grows to enormous size, well-grown heads measuring from 10 to 12 inches across. New Wonderful

Wonderful or New York Forms dense heads of bright green leaves that make it very conspicuous in the garden. The leaves are crisp, tender and juicy, qualities that will recommend it either for salads or garnishing. It certainly is a valuable sort, and is bound to win the favor of all who plant and cultivate it, either for home or market use. Pkt. 15c, oz. 35c, 1/4 lb. 95c, 1/2 lb. \$1.75, lb. \$3.25.

Giant Crystal Head

Cosberg This new lettuce which resembles "Iceberg" in general appearance is most remarkable for its crisp solid heads and superior flavor. The heads are not large, but extremely solid, a very attractive light green color and the best quality of a lettuce of this type we have yet seen. Its chief value is earliness and heading qualities under adverse conditions, when standard varieties fail to head. Pkt. 10c, oz. 35c, 1/4 lb. 75c, 1/2 lb. \$1.25, lb. \$2.40.

Crisp as Ice A most beautiful sort. The heads are solid, of immense size. The glossy leaves are thick, nicely crimped and curled, very tender and brittle. Pkt. 10c, oz. 35c, 1/4 lb. 85c, 1/2 lb. \$1.50, lb. \$2.85.

KOHL RABI

A large bulb is produced on the stem, which, if used when young, makes a delicious vegetable, having sweet, fine-grained flesh which has the combined flavor not unlike that of both Cauliflower and Turnip. Sow the seed in rows 12 to 18 in. apart early in the spring and cover ½ in. deep. Thin plants to stand 6 in. apart in the row. For a continuous supply, sow every two weeks. One oz. for 300 ft. of row; 4 to 5 lbs. per acre.

Early White Vienna The most popular extra-early short-topped variety of Kohl Rabi with firm flesh which cooks tender yet retains a desirable degree of crispness. The swollen stems are best when 2 to 3 in. of diameter. Pkt. 15c, oz. 45c, ¼ lb. \$1.15, ½ lb. \$2.00, lb. \$3.75.

MUSK- MELON

Melons thrive best in light, sandy, warm and rich soil. Plant about May 15th to 30th, in hills four feet apart each way. Plant ten to twelve seeds in each hill and after they are out of danger from bugs thin to three or four plants.

Pride of Wisconsin (Orange Flesh) A new melon that has become very popular. Its handsome appearance and heavy netting make it a good seller. The attractive almost round melons are of medium size, pearly gray, heavily netted, with remarkable thick orange flesh and small seed cavity. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

The rind is of golden color, with light netting and very small seed cavity. Flesh is firm; quality and flavor the finest, and the shape is more round than oblong. Pick as soon as fruit will slip from the stem. Handle carefully and you will find it a good shipper. Pkt. 10c, oz. 30c, ¼ lb. 70c.

Alneer's New Perfect Leader Color of skin is a deep rich green, well ribbed and thickly netted, while the flesh is a rich salmon. The melon is nearly all flesh, the interior being very small, hardly large enough to accommodate the seed. In flavor it is simply unexcelled, and it certainly justifies its name. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Queen of Colorado 88 days. Probably the best all around variety of muskmelon yet introduced. Certainly, no variety can claim superiority in flavor and eating quality. It holds up well for several days; allowing plenty of time for marketing. It is evidently a cross between Honey Rock and Hearts of Gold; combining the thick, tough rind and unsurpassed flavor of the Honey Rock with flesh texture of the Hearts of Gold. Will withstand shipping moderate distances. Melons solidly netted with a very coarse, loosely laced grey netting, slightly ribbed. Some larger than Honey Rock. Flesh thick and salmon in color. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

New Yorker 90 days. (Salmon Flesh) Also known as Schoon's Hard Shell Bender. Similar to Bender's Surprise in shape and general appearance, with the added advantage of possessing an extra hard shell, making it a good shipping variety. Fully ripe fruits keep better after harvest or stand longer in the field than most varieties. Fruits are deeply ribbed, well netted over a yellow skin and weigh from 5 to 8 lbs. The flesh is of a delicious flavor. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Gold Lined Rocky Ford A splendid type of the green-fleshed Rocky Ford, with gold lining next to the seed cavity, making it unusually attractive when cut. Very thick-fleshed, spicy and sweet. Nearly round and completely covered with netting. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25, post-paid.

Hale's Best The earliest maturing of all large melons. Even in a season remarkable for its coolness, the melons develop to luscious sweetness in 70 days after planting. The fruits are oval. Occasionally some fruits are somewhat more elongated. They have delicious, sweet, bright salmon-orange flesh which is firm, fine grained, and has a rich delightful aroma. It is one of the favorite new melons. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Tip Top (Salmon Flesh) A large size, main-crop melon, varying in shape from round to slightly oblong. The pale green skin is distinctly ribbed and lightly netted. The flesh is a beautiful deep salmon. It is sweet, spicy, and full of rich aroma. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Osage or Miller's Cream (Salmon Flesh) Thick, sweet salmon flesh of finest quality. Dark green fruits, medium size, nearly round. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Honey Dew These melons bring good prices in all markets. The thin, creamy white rind is very tough but very thinly netted. The fruits keep in fine condition for several weeks after they ripen. The rich, creamy green flesh is very sweet and possesses a delightful honey-like flavor. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

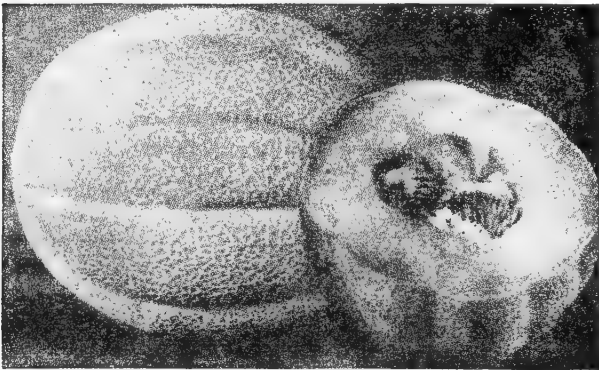

Banana Of a creamy white straw color, entirely free from netting; flesh thick, salmon color; grows from 18 to 30 inches in length; very productive. Delicious and sweet in flavor. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Vine Peach or Melon Peach The fruit has the size, shape and golden yellow color of an orange. The flesh is snow white, and makes excellent preserves. Pkt. 15c, oz. 40c, ¼ lb. \$1.00.

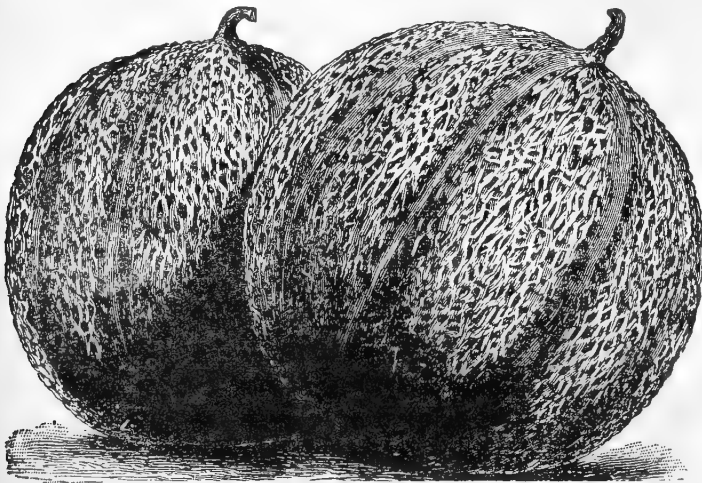

Honey Rock

Honey Rock (Salmon Flesh) Also called Sugar Rock. The medium size fruits have a gray-green skin with heavy coarse netting. The deeply colored salmon flesh is deliciously sweet and has a fine smooth texture. The fruits are almost round and very heavy, due to the thickness of the fine-grained crisp flesh. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

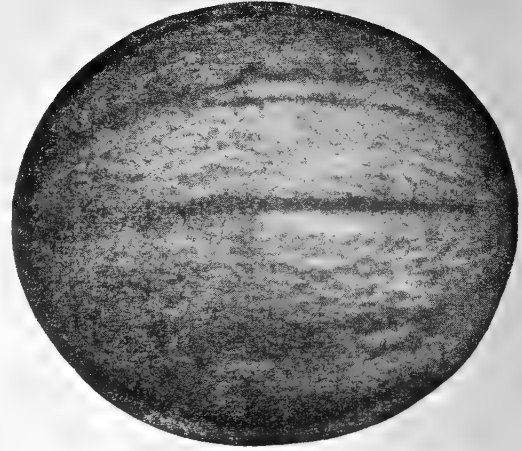

Milwaukee Market

Milwaukee Market A large variety, averaging 8 inches in diameter; has small seed cavity and thick, sweet, salmon flesh. Widely used by gardeners in the Milwaukee section for nearby markets. Will not stand distant shipping. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Hearts of Gold

Hearts of Gold Extremely thick, sweet orange flesh. An ideal basket and crate melon of medium size, round, heavily netted. Average size of melon 6 to 8 inches in diameter. Matures in 75 days. The seed cavity is small and the rind is very tough, making it a good shipper; its vine is a vigorous grower and a heavy cropper. A very convenient sized melon for the table and for packing in shipment. Does well in all sections. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

Bender's Surprise

Bender's Surprise

A delicious, large salmon fleshed melon weighing from 5 to 10 pounds with superior shipping and keeping qualities. Fruits, oblong, light greenish yellow skin with light netting. Flesh unusually spicy and very sweet. Pkt. 10c, oz. 30c, ¼ lb. 70c, ½ lb. \$1.20, lb. \$2.25.

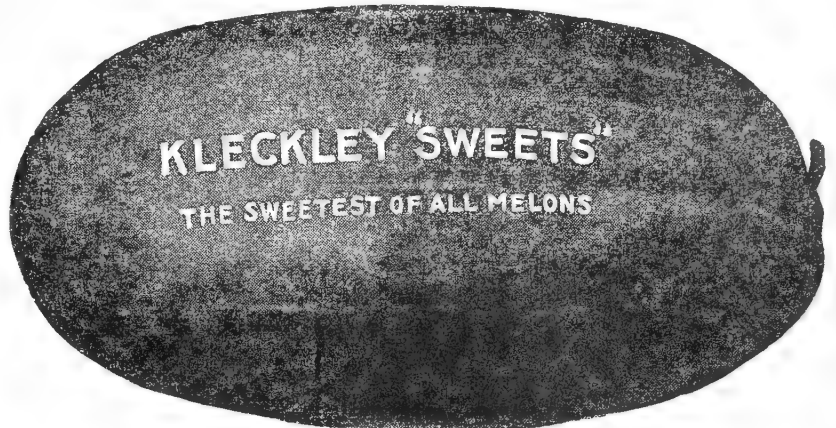

Watermelon

Kleckley's Sweets Are the sweetest flavored watermelons grown. Oblong shape, dark green skin; bright red flesh, always solid and of the most luscious flavor imaginable. The only fault we discover is that the rind is too tender for the melons to ship well to distant markets, but for the home garden and local market no other melon can equal the Kleckley Sweets. Pkt. 10c, oz. 25c, ¼ lb. 60c, ½ lb. 90c, lb. \$1.75.

Northern Sweet 75 days. A recent introduction from Russia by the Minnesota Experiment Station. It is one of the earliest melons we know of and has been matured as far north as Winnipeg, Canada. Fruit is small, weighing 10 to 12 lbs. Rind is dark green with a lighter stripe. Flesh is beautiful red, crisp, sweet and very excellent. Seed is light brown and small. Pkt. 10c, oz. 25c, ¼ lb. 60c, ½ lb. 90c, lb. \$1.75.

Harris' Earliest An early, large melon. Very sweet, delicious and attractive. Has beautiful red core, sweet and melting. Exceedingly productive. Pkt. 10c, oz. 20c, ¼ lb. 60c, ½ lb. 90c, lb. \$1.75.

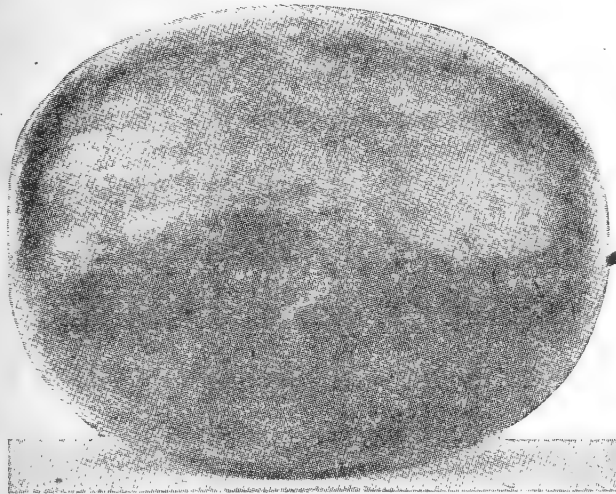

Culture: As soon as weather has become warm, plant 6 to 8 seeds in a hill spacing the hills 8 ft. apart each way. Cover seed ½ in. deep. A shovelful or two of well rotted manure should be mixed with the soil in the bottom of each hill. Thin seedlings to 2 or 3 in each hill. A packet will plant about 10 hills; an ounce about 30 hills; 3 or 4 lbs. of seed to the acre. Rich, light sandy soils produce the best Watermelons.

RADISH

Culture: For extra early use, seed may be sown in hotbed. For open ground culture, sow in spring as soon as ground can be worked, in rows not less than 1 foot apart, planting $\frac{1}{2}$ inch deep. Sow every 2 weeks for succession.

Alneer's New Fourteen-Day— This early Forcing Radish is of extremely quick growth, maturing in about two weeks under favorable conditions; the leaves are very short, which renders them particularly adapted for forcing under glass; they are of superior flavor, being crisp and tender, and in color they are a fresh, deep carmine red, very attractive. Pkt. 10c, oz. 25c, $\frac{1}{2}$ lb. 50c, $\frac{1}{2}$ lb. 80c, lb. \$1.50, 5 lbs. \$6.00, postpaid.

Saxa This is a European variety which has become very popular in the United States. It is one of the very earliest radishes and quite slow to run to seed. The general contour is turnip-shape, and size medium, very uniform, with flesh crisp, tender and sparkling. The rapidity of its growth recommends "New Sparkler" for growing in the greenhouse, but it is equally as valuable for sowing in the vegetable garden. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 40c, $\frac{1}{2}$ lb. 65c, lb. \$1.10, 5 lbs. \$4.50, postpaid.

TOMATO

Tomatoes do best in warm, moderately rich soil. Sow seeds early in March in hot bed or house, in shallow boxes. About May 15 to 20 in this latitude the plants should be set out in the open ground, in rows four feet apart each way. All seeds we offer are from critically selected specimens of fruit and must prove of the greatest value to the planter.

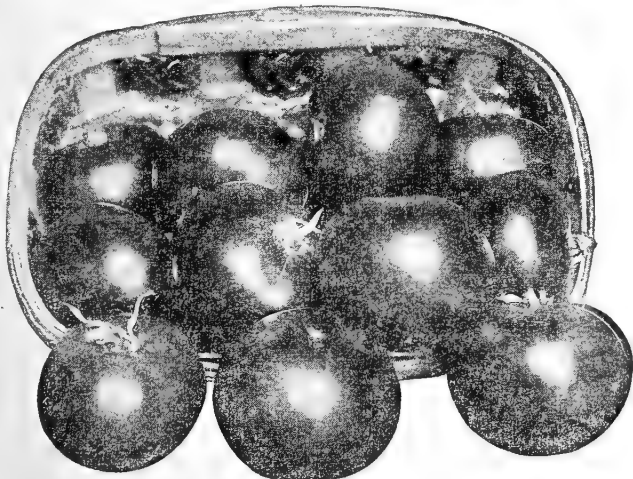

Firesteel

Firesteel 60 days. A small vine, large fruited tomato that is early, smooth, red through, of semi-acid flavor. Earlier than Earliana, less subject to cracking, with bush about 18 inches in diameter, but having sufficient foliage to prevent scalding of the fruit. For short, dry seasons and general adverse weather conditions, there is nothing that we have had that will equal it. It produces fruit when most others fail and can be relied on to set fruit when other types are dropping their blossoms. Pkt. 15c, 1/2 oz. 50c, oz. 85c, 1/4 lb. \$2.50, 1/2 lb. \$4.25, 1 lb. \$8.00.

The fruits are good size (average over 4 1/2 oz.) bright red all over, smooth and handsome and with no green spots. They are firm and solid and of excellent quality. Pkt. 15c, oz. 60c, 1/4 lb. \$1.85, 1/2 lb. \$3.00, 1 lb. \$5.75.

Starting Seed Indoors

A month before you expect to set the started plants outdoors fill a flat wooden box one inch deep with coal ashes or small stones and cover that with an inch of finely sifted rich soil. Sow the seed thinly, cover about one-eighth of an inch and press firmly. Cover with a pane of glass and two thicknesses of newspaper to prevent too rapid evaporation. Keep in a temperature between 60° and 70° and water regularly and carefully. When the seeds have germinated remove the glass. When large enough to handle, transplant one inch apart in a similarly prepared box where they may be kept until time to set outdoors.

Starting Seed Outdoors

A fine seed bed is necessary and the seed should not be planted deeper than four times their size.
